★★★★★

"We set this tent up next to the waterfall on our property for our Airbnb, and it has completely exceeded expectations... It has been fully booked all month, outperforming our Dome and Bell tents."

Mark Hiatt · Verified Airbnb Host

IDEAL OPERATOR USE CASES

Airbnb & Short-Term Rental

DIMENSIONS, MATERIALS & PRICING

A Room With
A View.

— WHY THE BRISA? —

Timeless
Style. Smart
Engineering.

"The majestic silhouette of a classic bell tent combined with the hassle-free performance of modern materials."

- **Cathedral-Style Architecture**
8.5-foot peak — substantially taller than standard bell tents. Full standing room, multi-level bunk potential, and an interior that feels like a room.

- **Natural Chimney Ventilation**
3 zip-out arched windows + mesh crown at peak. Cool air drawn in from sides, hot air exhausted upward. Comfortable in 90°F heat — no fan, no AC.

- **10-Minute Single-Pole Setup**
Stake corners → insert center pole → prop A-frame → attach guylines + rain cap. One person, zero tools, ten minutes. Ready for guests.

01

Chimney-Effect Ventilation

Three large zip-out arched windows with aluminum awning rods + mesh crown at peak. Cool air drawn in, hot air exhausted upward. Natural airflow — no mechanical cooling needed.

02

The Poly-Canvas Advantage

280 GSM PU-coated polyester canvas — cotton's aesthetic, none of the maintenance. Dries faster after storms, naturally mildew-resistant. Pack away slightly damp — no consequences.

03

Fortress-Grade Bathtub Floor

500 GSM PVC groundsheet rises 4 inches up the sidewalls — fully sealed basin. Same material as river rafts. Pitch on mud, snow, or wet ground. Zero moisture, zero insects.

●

1,500mm Waterproof Rating

Handles moderate to heavy rain reliably. The 500 GSM PVC tub floor adds a second layer of protection where it matters most.
